

Brainstorming & Idea Prioritization Template

Date	29 July 2026
Team ID	
Project Name	Rising Waters: Smart AI Flood Prediction System
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Govula Jaya Prakash Reddy	Develop a Machine Learning model to predict flood occurrence using weather data.	Machine Learning	1
2	Yerukala Madhu	Build a Flask web application for real-time flood prediction.	Web Application	1
3	V. Yuva Kishore	Compare Decision Tree, Random Forest, KNN, and XGBoost models.	Model Evaluation	2
4	Peddisetty Usharani	Perform data preprocessing and visualization for better model accuracy.	Data Analysis	2
5	Y. R. Kiran Kumar	Deploy the prediction system on IBM Cloud for remote accessibility.	Cloud Deployment	3
6	Entire Team	Provide an easy-to-use interface for disaster management authorities.	User Experience	3

Brainstorming & Idea Prioritization Template

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Machine Learning-based Flood Prediction System	High	High	High	Yes
2	Compare Multiple ML Algorithms and Select Best Model	High	High	High	
3	Flask Web Application with IBM Cloud Deployment	Medium	High	Medium	Yes
