

Project Initialization and Planning Phase

Date	29 July 2026
Team ID	
Project Name	Rising Waters: Smart AI Flood Prediction System
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Disaster Management Officer responsible for flood-prone regions	Predict floods early and issue evacuation warnings	Existing forecasting methods are not accurate or timely	Weather conditions change rapidly and traditional systems cannot analyze	Anxious about public safety and delayed emergency response
PS-2	A Meteorologist monitoring weather conditions	Analyze rainfall and weather data to identify flood risks	It is difficult to process large amounts of weather	Manual analysis is time-consuming and prone to errors	Overwhelmed and concerned about inaccurate predictions

			data quickly		
PS-3	A Disaster Relief Coordinator managing emergency resources	Allocate rescue teams and relief materials to high-risk areas	I cannot easily identify which regions are most at risk	There is no real-time intelligent flood risk prediction system	Stressed about inefficient resource allocation and delayed response
