

Project Demo Planning

Date	15 June 2026
Team ID	
Project Name	Rising Waters: Smart AI Flood Prediction System
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Framing the context of devastating flood disasters and detailing why traditional prediction paradigms fail.	2 mins	G. Jaya Prakash Reddy (Team Lead)
2	Data Engineering & Preprocessing	Explaining dataset parameters, distribution patterns, skew treatment, and feature scaling.	3 mins	P. Usharani & Y. R. Kiran Kumar
3	Machine Learning Architecture	Comparing models (Decision Trees, RF, KNN) and walking through the 96.55% accuracy achieved by XGBoost	4 mins	Y. Madhu
4	Web Application Walkthrough	Demonstrating the live Flask UI across operational Use Scenarios 1 & 2 (Early Advisories & Resource Allocation)	4 mins	V. Yuva Kishore
5	Cloud Deployment Structure	Discussing the architectural setup, configuration files, and scalability benefits on the IBM Cloud environment.	2 mins	Y.R.kiran
6	Conclusion & Future Frameworks	Recapping the core outcomes and outlining enhancements like automated live weather webhook integration.	2 mins	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Use visualization statistics from recent flood events to anchor the critical importance of timely early-warning windows.
	Solution Overview	Show a clear diagram mapping the workflow from exploratory data analysis to data validation and serialization file creation (floods.save).
3	Live Feature Demonstration	Execute runtime predictions live. Showcase Scenario 1 (meteorologist input) and Scenario 2 (coordinator multi-region overview) directly on the Flask dashboard UI.
4	Q&A Session	Ensure the team repository and hosting URLs are clearly displayed on the screen for evaluator review.
